# Parking Lot and Area Lighting Repair Specialists

💡 Are your parking lot pole lights cycling on and off?

💡 Do your fluorescent lights flicker or flame out?

💡 Are your customers

in the dark due to your parking lot lights, wall packs, storefront lights, sign lights, under canopy lights, or other security lights malfunctioning?

EEC can repair, maintain, retrofit, and refurbish your existing parking lot lights, wall packs, storefront lights, sign lights, under canopy lights, or other security lights.

EEC also offers new parking lot lighting layouts and installation in compliance with your local ordinance and codes.

---

---

**Call us today to schedule maintenance service for your lighting or to schedule your FREE estimate on new lighting installation!**

We specialize in parking lot and exterior lighting. Whether you are installing new lights or repairing existing lights our licensed electricians can accommodate any and all of your lighting needs. We have a fleet of bucket trucks that are designed to safely work at a range of heights, up to 140 feet.

## WHY?

Parking lot and area lighting installation and responsible maintenance presents a safe professional look to your property.

In addition to increasing the safety and security of your business and surrounding areas, proper lighting also greatly increases the security and comfort of all individuals entering or leaving your property.
